

Catalytic Static Mixer Pd - Palladium

DESCRIPTION

Palladium Catalytic Static Mixer (CSM) 316L to fit reactor tube ID of 6mm dia x 150mm long. Multiple CSM's can be inserted into longer reactor tubes.

This CSM is a general hydrogenation/dehydrogenation catalyst that exhibits very high activity with moderate to low selectivity. Can be used across a wide pH range.

DETAILS

Core: 3D printed 316L stainless steel

Catalyst: Pd

Mixer Shape: Cylindrical

Dimensions: 5.7mm diameter x 150mm length

Catalytic static mixers are a novel immobilized catalyst system, based on 3D printed mixer scaffolds containing a catalytic active layer. A variety of different active catalysts can be deposited on the metal mixer, allowing employment in many different classes of chemical reactions, such as hydrogenations, oxidations, C-C couplings and many more. Active Pd mass is >100mg/Mixer. Mixer volume 957mm³.
